Name \_\_\_\_\_

CCSS 2.L.1.e Use adjectives and adverbs, and choose between them depending on what is to be modified

### Adjectives

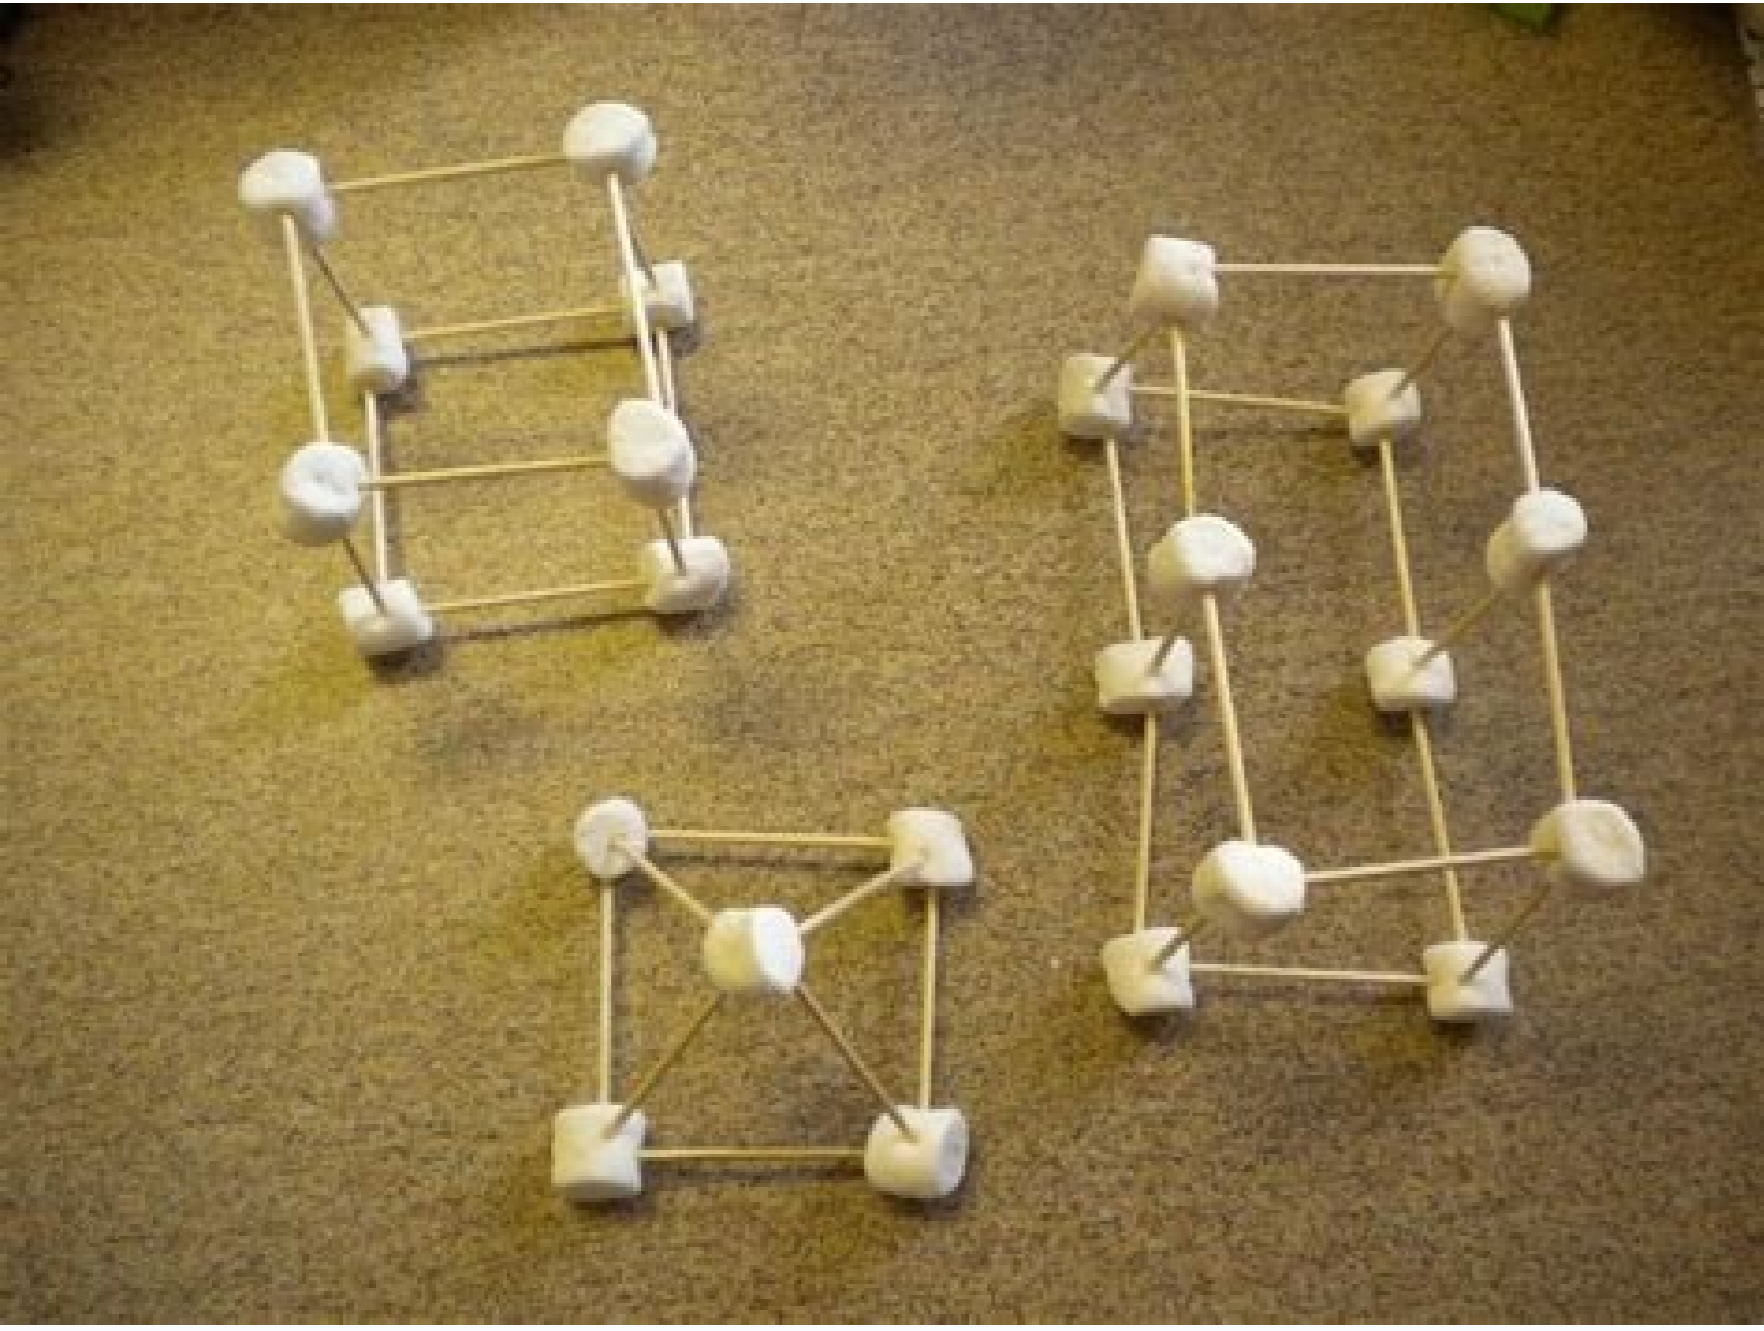

Directions: Choose the correct form of the adjective to complete each sentence. Write your answer on the line.

Some adjectives end in -er or -est when comparing nouns. Add -er to most one-syllable adjectives that compare two nouns. Add -est to most one-syllable words that compare more than two nouns.  
example: The fur coat is **warmer** than the jacket.  
The black dog is the **biggest** of all three dogs.

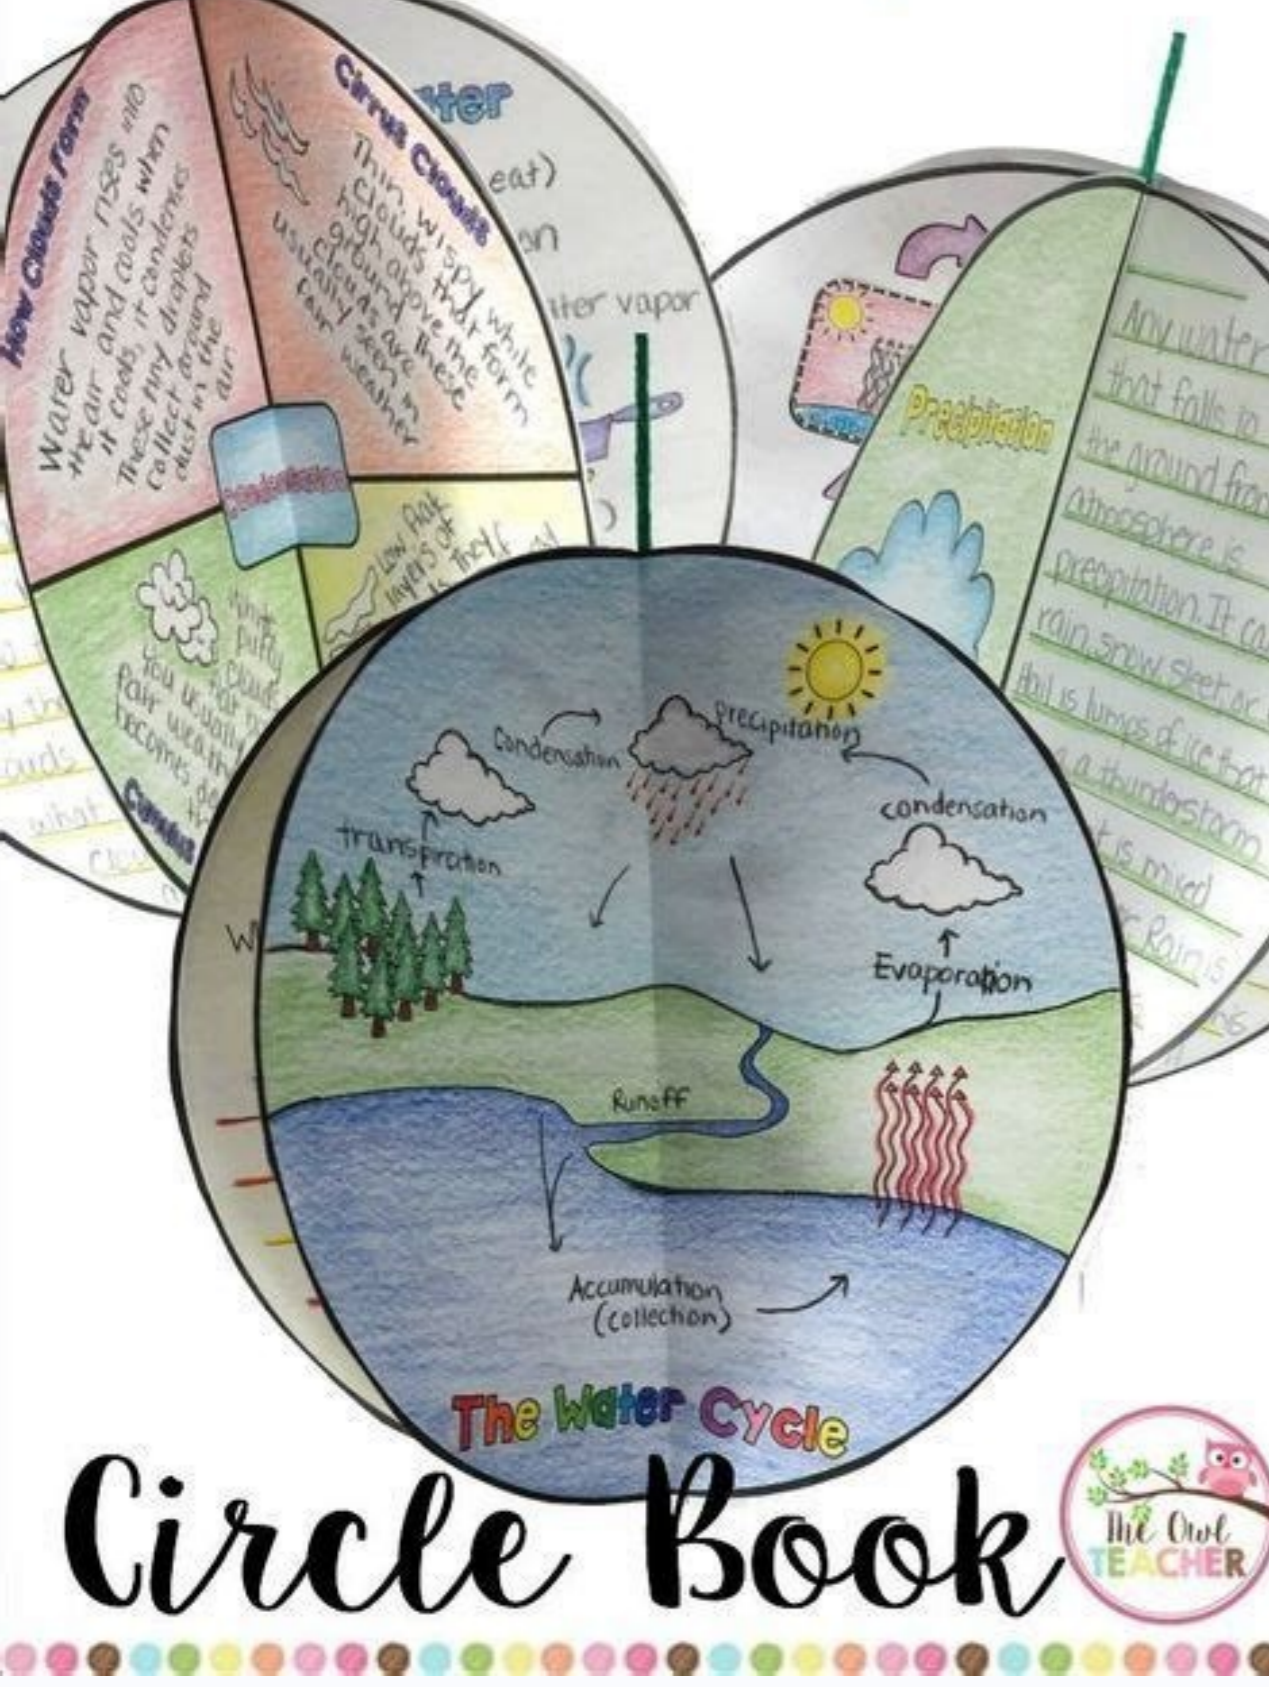

1. Jon is the \_\_\_\_\_ boy in class. ( tall , taller , tallest )
2. Is Laura \_\_\_\_\_ than Sue? ( tall , taller , tallest )
3. Sam's house is \_\_\_\_\_ than my house. ( big , bigger , biggest )
4. Who has the \_\_\_\_\_ house on the block? ( big , bigger , biggest )
5. That is the \_\_\_\_\_ baby I have ever seen. ( cute , cuter , cutest )
6. The gray kitten is \_\_\_\_\_ than the black kitten. ( cute , cuter , cutest )
7. Was it \_\_\_\_\_ today than yesterday? ( hot , hotter , hottest )
8. Today was the \_\_\_\_\_ day of the year. ( hot , hotter , hottest )
9. Who is the \_\_\_\_\_ girl in school? ( young , younger , youngest )
10. Lorelei is \_\_\_\_\_ than her brother. ( young , younger , youngest )

Did you complete each problem.

# Water Cycle

Building the unit circle worksheet answers.

Don't worry. Each radian segment flies as a fraction above 4, so that students can see how the divisions  $\mu$  a unit circle are  $1/4, 2/4, 3/4, 4/4, 5/4, 6/4, 7/4$  and  $8/4$ , and then these radians are simplified. Page 4 Microsoft Smart Art graphics can be easily changed to match the colors of your school or presentation theme No.  $\hat{a}$  Generate each Radian Measure just by counting. Why make a circle where the radius 1, you can't ask? If you don't put the left hand, palm up, in the first quadrant your fingers mimic the special right triangles we talked about above: the triangle 30-60-90 and the triangle 45-45-90. If the radius has a length of 1, this means that each Reference TriAngle we create has a hypotenuse of 1, which makes it much easier to compare one angle with another. Reference Triangle in the First Quadrant of the Unit Circle But the Unit Circle is more than just a Circle with a radius of 1; it's home to some very special triangles. In the video below, I will show my simple tA© cinicas to quickly memorize the Radian Measurements and all Coordinates for all Angles! Don't try to calculate all these angles anymore. The  $\hat{a}$  included in these notes are: degrees, radians, coordinate points and unit circle. If you wish, you cannot buy the entire unit. Here, the unit circle is presented as a collection of  $\mu$  in radians first by octaves, then by dudA© cimios and then as a division in Angles first by 45 degrees, then by 30 degrees. Well, the Circle of Unity, according to RegentsPrep, is a circle with a radius of a unit, centered on the origin. Moreover, this left hand trick will help you not to memorize the unit's circle, but it will also allow you to evaluate or find all six trig  $\mu$ . AlA ©m of this, as the Khan Academy very well states, the Circle of Unity helps to define psine, cosine and tangent for all the real ones, and these proposals  $\mu$  (which we have in the palm of our own Be used even with larger or smaller circles than a radius of 1. Yes, in fact! As you are watching the video, you will learn to: Draw the unit circle. 30-60-90 triangle45-45-90 Triagle45-45-90 Well, these triagulus of special law help us connect everything we learned from reference, reference triams and trigonomâ functions And puts all together in a happy happy circle and allows us to find angles and lengths quickly. Unit Circle Worksheets Unit Circle Circle Video 1 HR 38 min Intro for Veheo: Unit Circle 00:00:40  $\hat{a}$   $\hat{c}$   $\hat{e}$  "Rape Revision of the Six Trigmes + Functions How to represent them in a circle of Trigs 00:07:32  $\hat{a}$   $\hat{c}$   $\hat{e}$  "Triagans and your importance 00:23:51 - Creating the unit circle + trick on the left! 00:46:37  $\hat{a}$   $\hat{c}$   $\hat{e}$  "Examples # 1-7 00:55:32  $\hat{a}$   $\hat{c}$   $\hat{e}$  "Examples # 8-18 01:45:45 - Examples # 19-27 01:25:35  $\hat{a}$   $\hat{c}$   $\hat{e}$  "Examples # 28 -36 Want to your precalculus or trigonometry students to determine the trigonometric function values of angle (degrees) in the unit circle? The unit circle has a Easy to follow, and all we have to do is count and seek symmetry. The whole unit includes: angle conversions, degrees, radians, coordinate points, unit unit, evaluating function Launches of trigas, and sine graphics and cossen.page 3 The graphics are Microsoft smart art graphics and can be easily altered to match your school colors or presentation theme . The unit circle is probably one of the most important topics in all trigonometry and it is fundamental to understand future concepts in the mathematic analysis, calculation and in addition. For an activity similar to this, but with indulgent data in radians, cliq EU here. To complete the activity, students are there! Need some notes of teacher-written teachers, revision of simulation and evaluation for this school year? Circle of unity with triagans right now, I agree it may sound scary, but the cool thing about what I'm about to show is that you don't have to ERA EW, REHTEGOT .ETANIDROOC YREVE DNA HCAE EZIROMEM RO ETAULAVE OT DEKSA NEHW DETARTSURF GNITTEG EROM ON 5 EGAP.DEIFILPMIS ERA SNAIDAR ESEHT NEHT DNA 4/8 DNA, 4/6, 4/6, 4/5, 4/4, 4/3, 4/2, 4/1 ERA ELCRIC TINU A FO SNOISIVID EHT WOH EES NAC STNEDUTS OS 4 REVO NOIDAR HCAE.
