Try answering these hard theory test practice questions to get yourself prepared for your big day. 1. You see a pedestrian with a dog wearing a yellow or burgundy coat. what does this indicate? The pedestrian is:a) Elderlyb) Dog trainingc) Colourblindd) DeafThis is a particularly hard theory question because if you don't know it already, you won't be able to work the answer out! The correct answer is D. There are many different types of assistant dogs who can be recognised by the colour of their jackets, but hearing dogs can usually be spotted by their burgundy or yellow coats. 2. In which of these situations should you avoid overtaking?a) Just after a bendb) In a one-way streetc) On a 30 mph roadd) Approaching a dip in the roadThis is one of the hardest theory test questions. You should always think twice before overtaking, so depending on the context any of these answers could be correct. However, there's only one answer here that's always correct, regardless of the context. So, the correct answer is D - approaching a dip in the road. 3. What does this sign mean?a) End of restricted speed areab) End of restricted parking areac) End of clearwayd) End of cycle routeYou should aim to do a lot of these types of theory practice questions because there are so many road signs to memorise and it's easy to get confused. With this particular theory question, all the answers look quite similar on the page, which makes it even harder! The correct answer here is B - end of restricted parking area. 4. You are travelling at 50 mph on a good, dry road. What is your typical overall stopping distance?a) 36 metres (118 feet)b) 53 metres (175 feet)c) 75 metres (245 feet)d) 96 metres (315 feet)This might seem like one of the hardest theory test questions for someone who doesn't have a head for numbers, but thankfully there's a formula that can be used to calculate this: stopping distance equals reaction or distance, more braking distance. Thinking distance is the distance that your car will move while reacting to a situation and the braking distance is as far as your car will move while pressing the brake. The official thought distance for 50 mph is 15 m and the braking distance is 38 m. Add and get the correct answer: B - ~ 53 m ≈ TM. Do not forget that the weather conditions and condition of your vehicle in which you are located can affect the distance of detention: questions can add additional information like this to try to deceive you! 5. At a crossroads of friars, what color does the green sign follow? A) Constant redb) Amberc) Flashing Greenat First Girmance, this might not seem one of the questions and answers of the most difficult theory tests. But while it is possible that you are familiar with a cross of friars, it can be easy to confuse between the crosses of friar and pelicans! The friar crosses work using sensors that detect when the pedestrians are crossing, which means there is no intermittent amber phase. Then the answer is C - "Amber". 6. What percentage of all emissions represents road transport? A) 10%B) 20%C) 30%D) 40%This is a test question of difficult theory if not very well versed with environmental problems! But fortunately you can use the removal method to reach the correct answer. Traffic is a big contributor to air pollution, but 40% seems a bit much and 10% is very little: the answer is B - ~ 20% ≈ TM. 7. You're towing a small trailer on a busy three-lane highway. All lanes are open. You should: (a) not exceed 50 mphb) not overtakec) have an adjusted stabilizer) use only the question of left and central lanesthis theory. However, the correct answer is d - "use only the left and central lanes." 8. In an incident, it is important to care for the victims. when the area is safe, you should:a) get them out of the vehicleb) give them a drink. Give them something to eat) keep them in the vehicle this has a test answer of trick theory because it requires you to do nothing at all! the correct answer is d - 'keep them in the vehicle.' This could go against your instinct because many theory questions about incidents, accidents and emergencies indicate that it is better to remove car casualties (e.g. if the vehicle is at risk of catching fire or in imminent danger). the key to this theory question is that "the area is safe". Be sure to read all the questions carefully so that important details like this are not lost! 9. You're waiting to get out of a minor way. a large vehicle approaches from the right. You have time to turn, but you should wait. Why?a) the big vehicle can easily hide an overload vehicle) the big vehicle can spin suddenlyc) the big vehicle is hard to run in a straight line) the big vehicle can easily hide the vehicles from the left this is one of the most difficult questions of the theory for those who fight with so left and rights! Take the time to really build the stage in your head before answering. In this case, the answer is to - "the large vehicle can easily hide an overload vehicle." 10. When can you take another vehicle on the left?a) when you're on a one-way street) by approaching a motorway slide road where it will turn off) when the front vehicle is signposting to turn left ecah ecah ol C n<sup>3</sup>Aicpo al orep - areiuqlauc ed orbil le ne n<sup>3</sup>Aiccudnoc ed a<sup>3</sup>roet asufnec atnugerp anu se atsE laud alliterrac anu ed ohcered lirrac le rasu edeup on ,senoicaluger sal n<sup>3</sup>AgeS .hpm 06 sol redecxre etimrep el es on dadilaer ne orep ,rodatnet recerap a<sup>3</sup>rdop ."hpm 05 sol redecxre on" ,n<sup>3</sup>Aicpo aremirp aL .ellated ne atsipotua us ed senoicaluger sal odasiver ah on is rednopser ed lic<sup>3</sup>fid a three-way highway (unless you are told to do so due to the closure of lanes or road work,) so the correct answer is d - "use only the left and central lanes." 8. In an incident, it is important to care for the victims. when the area is safe, you should:a) get them out of the vehicleb) give them a drink. Give them something to eat) keep them in the vehicle this has a test answer of trick theory because it requires you to do nothing at all! the correct answer is d - 'keep them in the vehicle.' This could go against your instinct because many theory questions about incidents, accidents and emergencies indicate that it is better to remove car casualties (e.g. if the vehicle is at risk of catching fire or in imminent danger). the key to this theory question is that "the area is safe". Be sure to read all the questions carefully so that important details like this are not lost! 9. You're waiting to get out of a minor way. a large vehicle approaches from the right. You have time to turn, but you should wait. Do you remember how unbelievable you felt in stressful and time exam conditions? Adapt to think and write more quickly by making our mock exam papers, and you can relieve something of the tension in the real day! Most of the trial documents includes an official marking scheme, which can scrutinize to memorize the keywords of response, and not lose point, especially for open responses Laziness is a universal habit. Many trial documents have repeated questions from the last years, and when making past year examination, you will know the answers when the same questions appear again! Although we do not produce any of these trial documents, we scan through the Internet in the Internet, looking for the best and most relevant examination documents, before compiling everything on our website. Our trial papers are especially curated and including the review of the best primary schools in Singapore, such as Raffles Girls, Primary, Nanyang Primary, Ai Tong School and Rosyth School. We present official national exam documents such as IB, O-level and A levels that are certified by Cambridge and Moe for free download. Our national exams come with complete official responses sheets to improve your learning experience. Always start with the "easier" test documents and strive for their completion and perfection. At this stage, you must work to strengthen your foundations, and the questions of "Memorization and Revival." Do not be afraid to consult the answer sheets if you are not sure how to make the perfect answers. Once you feel comfortable answering these questions, slowly move to the simulated test documents under test conditions. By making simulated documents, you are training your mind to think under pressure and your hand in writing on short duration. Finally, mark your scripts strictly and take note of neglected errors. Once you feel comfortable answering these questions, slowly move to the simulated test documents under test conditions. By making simulated documents, you are training your mind to think under pressure and your hand in writing on short duration. Finally, mark your scripts strictly and take note of neglected errors. Reviewing your complete test documents can be as simple as briefly reading your mistakes and understanding how you made those mistakes. By analyzing your mistakes, you can learn how you fell in love with these "traps for men," and avoid making similar mistakes in the future. Your lack of familiarity with a particular subject can also be amplified during your review process, especially if you continue to make similar errors in multiple test documents. Make a friend or two to help your learning by marking and reviewing your documents, and then correct your understanding and response techniques. With your experience and experiences, some tutors can even provide you with exam tricks that you developed for your previous exams. Mark important errors and neglected errors with different color highlighters. Practice your handwriting clarity, as some examiners may deduct unclear word marks during the exams assign less time than the actual exam duration to have more time for thorough control at the end of the previous exams, they are becoming a
